Getting the best signal strength

To get the best signal strength, please refer to the diagram below.*

**If you are unable to connect to your Wi-Fi, you might need to get a Wi-Fi range extender to boost your existing Wi-Fi signal.*

Connecting to your SmartChoice™ II Wi-Fi:

Place your system valve in “Wi-Fi Setting” mode.

On the valve press the Clock and Down buttons at the same time and hold for 15 seconds.

1

Press Clock and down buttons together and hold for 15 seconds

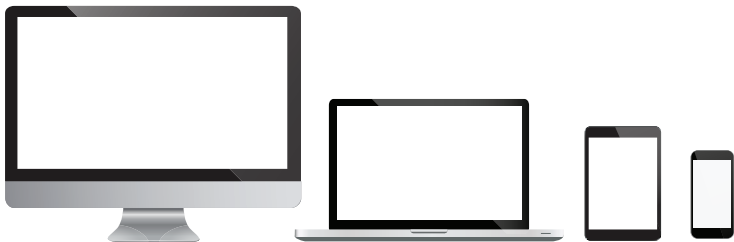

Connecting to your SmartChoice™ II Wi-Fi:

2

Using a computer or mobile device, “Wi-Fi network manager”, select the Wi-Fi network that matches your Aqua Systems equipment MAC id. See your equipment documents for exact name. (ie. B0xxxxxxxx).

(If you do not see your Aqua Systems equipment MAC id, go back to step #1 to place your equipment in “Wi-Fi Setting” mode again.)

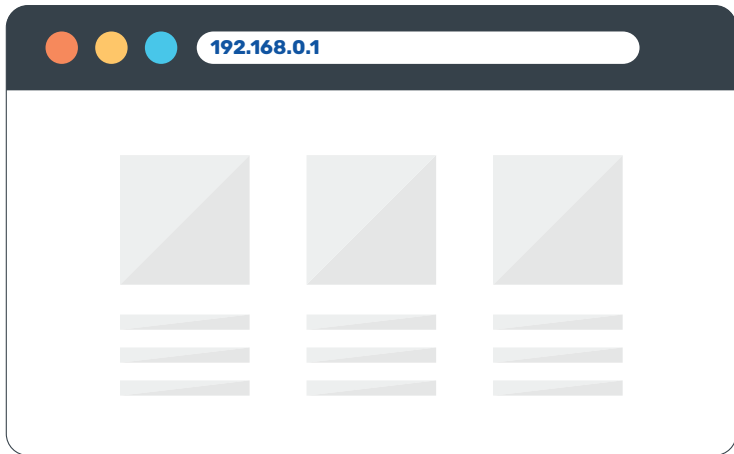

If this is the first time that you are connecting, you will be asked for a password of “12345678”

Connecting to your SmartChoice™ II Wi-Fi:

Using the same computer or mobile device, open the web browser and enter the address: 192.168.0.1

3

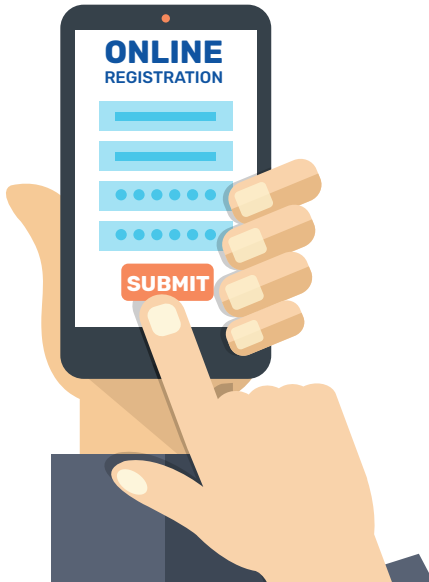

After the page loads, select the Wi-Fi network that best suits your Aqua Systems equipment.

If the network you are selecting is password protected, type in the Wi-Fi network password and enter.

Connecting to your SmartChoice™ II Wi-Fi:

To complete setup, visit <https://wifi.ilovemywater.com> and register your Aqua Systems equipment.
